

Preston Louis Ursini

curriculum vitae

Abstract

Engineering, the elegance of substance combined with art form.

A mind of being, a way of life. The ability to not only dream, but transcend dreams into what we call reality. The power to create something that is more than the sum of it's parts.

Education

From 2005 to 2007, I attended Murray State University in the Computer Science and Business Administration Divisions. I studied Calculus, Discrete Mathematics, Economics, and Accounting. I attended classes in Programming, Database Design and Management, Human History, and Humanities.

Experience

From 2005 to 2007, I began forming my first company by providing IT Services. In 2007 I formally incorporated my first business alongside my distinguished colleagues. In 2010, we launched our first mass-production product, and formed The Fire Horn, Inc.

Technical Skills

| | | | |
|-----------|--------------------|---------------|-------------|
| Linux | FreeBSD | Mac OS X | Windows NT |
| PHP | C | C# | Objective-C |
| Photoshop | Illustrator | After Effects | Flash |
| vi | iptables | asterisk | subversion |
| bash | TCP/IP programming | MySQL | More... |
